

1. Write a program to display the cube of the number up to an integer.

Input: 5

Expected Output :

Number is : 1 and cube of the 1 is :1

Number is : 2 and cube of the 2 is :8

Number is : 3 and cube of the 3 is :27

Number is : 4 and cube of the 2 is :64

Number is : 5 and cube of the 3 is :125

2. Write a program to input a number from user and find reverse of the given number using for loop. How to find reverse of any number using loop in program.

Input : 123456

Expected Output : 654321

3. Write a program to find the perfect numbers between 1 and 30.

The perfect numbers between 1 to 30 are:

6

28

4. Write a program to find the factorial of a number.

Sample output:

Input: 5

The factorial of the given number is: 120

5. Write a program in to find the number and sum of all integers between 100 and 200 which are divisible by 9.

Sample Output:

Numbers between 100 and 200, divisible by 9:

108 117 126 135 144 153 162 171 180 189 198

The sum : 1683
